[Apache XMLBeans](#) is an effort undergoing [incubation](#) at the [Apache Software Foundation \(ASF\)](#), sponsored by the [XML project](#).

Incubation is required of all newly accepted projects until a further review indicates that the infrastructure, communications, and decision making process have stabilized in a manner consistent with other successful ASF projects. While incubation status is not necessarily a reflection of the completeness or stability of the code, it does indicate that the project has yet to be fully endorsed by [the ASF](#).
