

XMLBeans Samples

1.

Click the name of a sample listed below to go to a page that describes the sample in more detail. From there, you can view the files that make up the sample. This sample repository is just getting started, so be sure to check back for new additions.

To get started with the samples, follow the instructions on the [Installing XMLBeans](#) page first. Then get the sample code in one of the following ways:

- download all samples ([zip tgz](#))
- download individual samples [below](#)
- all sample source is available in [CVS](#)

If you have a sample that you'd like to share, grab the [sample template](#) and donate it to us. We'd be happy to post it!

2. Samples List

Title	Download	Date Available	XMLBeans Technologies
All samples Get 'em all at once.	zip tgz	2004-09-15	all
MixedContent Work with mixed content XML by combining strong types generated from schema with an XmlCursor instance.	zip tgz	2004-09-15	cursor
SchemaEnum Access XML values that are defined in schema as enumerations.	zip tgz	2004-09-15	schema: enumerations
SampleTemplate A template for sample authors to get started.	zip tgz	2004-09-15	template

Please follow these conventions.
