

XMLBeans Source and Binaries

1. XMLBeans Version 1.03 Binary and Development Kit

[Download XMLBeans Version 1.03 from one of the Apache mirrors.](#)

[You can also download from main Apache Distribution Site](#)

[Here is the main Apache XML Project Downloads page \(Including XMLBeans\)](#)

You should verify the integrity of the files that you download. [Here are some instructions for verifying the integrity of a downloaded file](#)

2. XMLBeans Source

2.1. Source via CVSView

XMLBeans source via CVSView: [Here](#)

2.2. Source via CVS checkout

If you have CVS installed on your machine you can issue the following commands to get XML Beans source:

```
cvs -d :pserver:anoncvs@cvs.apache.org:/home/cvspublic login
password: anoncvs

cvs -d :pserver:anoncvs@cvs.apache.org:/home/cvspublic checkout xml-xmlbeans
```

2.3. Building XMLBeans Version 1.0

2.3.1. Windows

After the steps above you should see an xml-xmlbeans directory:

```
cd xml-xmlbeans\vl
xbeanenv
ant
```

This will create a build directory containing the executables. The `xbeans.jar` is in the `xml-beans\src\ar` directory. Try `ant -projecthelp` to see other build options.

2.3.2. Unix

need blurb here on building in Unix, very similar to above Windows build
